Proper installation and servicing of your fire protection equipment is an investment in the safety and well being of the people, property and business in your care.

The Company

Fire Protection Services Pty Ltd is a privately owned and independent Australian Fire Protection Company. It was established in 1998 to provide complete fire service maintenance, to be an informative business and an asset to its clients. Fire Protection Services maintains small business principles and practices ensuring successful relationships with its clients and customers.

The People

Our staff play a vital role in ensuring the success of our business. An environment based on teamwork. All staff pride themselves on their knowledge and excellence in customer care. The occupational health and safety of all persons employed within the organisation and the worksites we service are considered to be of the utmost importance.

Servicing

Our team of professionals, service all types of fire fighting equipment. They ensure that our customers have peace of mind, safe in the knowledge that their staff and premises have adequate equipment. There is now a distinct clear advantage for adopting one single contract such as total visibility of your fire safety strategy; asset registers of all your fire safety equipment; You can rest assured that there will be no gaps in your level of fire protection, that will commonly occur if you have several fire providers.

Repairs and Installations

We offer a 24hr x 7 day service to all our clients.

Minor repairs right through to brand new installations and building alterations to meet clients requirements. All works are always completed by licensed trades people and trained technicians.

Fire Protection Systems

We supply, install and maintain complete systems. These include Smoke Detectors, Fire Alarms Panels, Exit and Emergency Lighting, Fire Sprinkler Systems and Fire Hydrant system pumps. All servicing and installations are always carried out in full compliance with current Australian Standards.

Automatically scheduled maintenance visits - Fire Protection Services P/L uses its computer database management system to schedule your sites individual requirements. Our program insures your routine testing and servicing is completed on time every time.

- Quotations are generated as a result of faults identified through routine testing and maintenance.
- Full Asset tracking
- Full Asset history at the touch of a key.

Environment

Fire Protection Services Pty Ltd is committed to the environment and strives to continually improve all our operations.

We strive to protect the environment by minimizing waste within our control and following best management practices and procedures and are constantly being reviewed.

In-house Fire Extinguisher Pressure Testing and Refilling Station

Fire Protection Services Pty Ltd is a licenced test station (Lic No: 580)

Every unit that enters our premises is individually identified to our clients site and is tracked through its pressure testing or refilling stages until completed and returned to site. We are at a full advantage having this facility in our office / warehouse, and as part of our company structure we have full control at every stage of these works. Quality assurance is maintained throughout which provides a competitive edge.
